Renogy 100 Watt 12 Volt Monocrystalline Foldable Solar Suitcase With Charge ...

Renogy 100 Watt 12 Volt Monocrystalline Foldable Solar Suitcase With Charge Controller is the simple solar power solution that folds easily into a compact travel case. Weighing just over 21lbs., this lightweight system includes two 50 Watt Monocrystalline Solar Panels, one 20 Amp waterproof Voyager Charge Controller with an LCD Screen, a tray cable with alligator clips for easy battery connection. The Renogy 100 Watt Solar Suitcase makes charging on the go easy!

Renogy 100W Solar Suitcase comes with adjustable aluminum kickstand. It will make charging on the go easy! Building your own solar system is no longer difficult.

Renogy solar panels use low iron-tempered glass which is more durable than standard solar panels. High quality protective case and IP 65 rated splashproof and dust proof make it an ideal unit to bring along outdoor adventures. It works perfectly fine even when exposed to harsh weather.

Unlike other low-grade solar cells, the Renogy 100Watt portable solar panel uses Grade A+ Monocrystalline Solar Cells which passed rigorous EL testing. It will not suffer from hidden cracks or other safety issues, ensuring a high conversion efficiency of up to 22%.

The Voyager controller is included in the package. It automatically adjusts to 12V or 24V system voltage when paired with a Gel, AGM, or Flooded battery.

Advanced, smart PWM technology charge controllers maximize charging efficiency and safety. The smart, waterproof Voyager 20A charge controller has multiple intelligent safety features to prevent reverse polarity, over-charging, short-circuits and reverse current. Smart charging keeps your batteries protected 24/7!

The Eflex solar panel can charge most batteries (charge controller needed) and power stations. It is important to ensure that the open circuit voltage of the panel will not exceed the max DC input voltage rating of the powerstation or charge controller.

Solar panel performance may be hindered for a number of reasons. Most commonly environmental conditions such as indirect sunlight, temperature rise, cloudy sky, and dirt and stain build up on the top glass will cause a reduced power output.

100W, 12V, 0.8kWh Professional Off Grid Kit

This small scale off grid kit comes in two solar panel size options and is ideal for light usage applications such

## 100w solar panel kit uk

as summer houses and garages.

All of our kits designed for houses (on-grid and off-grid) are supplied with full instructions and telephone support, however a competent electrician should be used to make the final connection.
