

20 kWh byd energy storage

20 kWh byd energy storage

Ideal for Home Backup energy storage, this bundle includes the following:

Clean Energy Council (CEC) approved battery (what is this?)

When purchasing we can also offer a Red Hot Deal on the BYD LV BMU for inverter connectivity and monitoring. Contact us to discuss this recommended add-on option.

*Free Shipping to metro business addresses with unloading facilities, otherwise tailgate fees may apply. Please contact us for more information.

Yep, we know... there are lots of options when buying products online.

We also believe in providing you with only the highest quality products, combined with exceptional customer service. How You Win:

We offer Free Shipping on most products, however some custom orders and heavy/bulky items may require specialised freight to some destinations, as noted on the affected products. We want to be upfront. Nobody like nasty surprises and we strive to give you the best value. In these instances, we will contact you before processing the order to determine the fastest and most cost effective way of getting your items delivered.

By engaging with Buzz Energy Systems, purchasing and utilising our products and services, you acknowledge and agree to the following indemnity disclaimer. This disclaimer covers any potential claims for death, injury, property damage, financial loss, or warranty claims:

Assumption of Responsibility: Buzz Energy Systems shall not be responsible or liable for any consequences arising from the installation, operation or use of our products or services, excluding any rights or remedies you may have under the Australian Consumer Law or other applicable legislation. You, as the user or purchaser, assume full responsibility for any potential risks, damages, or losses that may occur, including those not covered under Australian Consumer Law.

Proper Installation and Use: It is your responsibility to ensure that the installation, operation, and use of our products align with relevant laws, regulations, and safety guidelines. We strongly recommend seeking the expertise of licensed professionals to handle installations above ELV levels and to ensure compliance with all
