Got it in the mail yesterday and ran down to the nearby supercharger to test- works as promised with Ford Plug and Charge. I've been using a Lectron NACS to J-1772 adapter for years so had high hopes this would work and was not disappointed. Check NACS to CCS Adapter

I bought this and have used it once, mostly just to test it out. I kept it plugged in for about 15 mins. Didn't get warm or do anything weird. Worked as expected. And charger was super fast. Check NACS to CCS Adapter

What wonderful charger. Bought 3 of them & love the chunky, robust design & its simplicity. I especially like the extremely thick cable & handle. Thanks Lectron for coming to market with a future proof NACS (Tesla) charger that will last for years. Check Portable Level 2 Tesla EV Charger
