Vigood Solartek is a India's No -1 Growing Solar Manufacturing Company. Based out of Modinagar, Ghaziabad Uttar Pradesh, It is an ISO 9001-2015 certified company and recognized startup by Government of India. And We have wide range of Mono Perc Half Cut Bifacial Solar Panels, Solar Inverter, Solar Battery, Solar Galvanized Iron Structure & Solar Installation kit etc. Solartek assure that he will deliver the material in pan India within 5 to 7 working days.

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions. We have:

Sourced the majority of our data from hundreds of thousands of quotes through our own marketplace.

Incorporated third-party data and information from primary sources, government agencies, educational institutions, peer-reviewed research, or well-researched nonprofit organizations.

Built our own database and rating system for solar equipment, including solar panels, inverters, and batteries.

We won't charge you anything to get quotes through our marketplace. Instead, installers and other service providers pay us a small fee to participate after we vet them for reliability and suitability. To learn more, read about how we make money, our Dispute Resolution Service, and our Editorial Guidelines.

3.5 kW solar systems (or 3,500 watts) are the average consumption size for smaller households. When you decide to invest in home solar panels, the cost to install the system on your roof is one of the most significant factors determining your long-term solar savings. Want to know the best way to ensure you get a good deal? Compare your solar quotes with the prices other solar shoppers paid for solar systems in your neighborhood. Learn more about the cost of 3.5 kW solar systems, how much electricity they can produce, and the smartest way to shop for solar.

As of January 2022, the average cost of solar in the U.S. is \$2.77 per watt (\$9,695 for a 3.5-kilowatt system). That means the total cost for a 3.5kW solar system would be \$7,174 after the federal solar tax credit (not factoring in additional state rebates or incentives).

Using data from the EnergySage Solar Marketplace, the largest comparison-shopping platform for

3 5 kva solar system

homeowners looking to install a solar panel system, we analyzed the range of prices that solar shoppers were quoted for 3.5 kW solar energy systems across the United States.

The prices in the table below represent what you can expect to pay before the federal tax credit for solar has been deducted. Depending on where you live, other solar rebates and incentives from the state government, local government, or your utility might reduce your upfront costs even further. If there's a market for solar renewable energy certificates (SRECs) in your state, you may also be able to sell the SRECs your system generates for extra income.
