

3 phase on grid solar inverter

3 phase on grid solar inverter

The S6-GC3P(80-100)K07-LV-ND three-phase string inverter is the representative product of the new generation of Solis C& I solutions. With an MPPT current of up to 54A, it is perfect for all 182/210mm high-power PV modules and supports more than a 150% DC/AC ratio, bringing more yield. It features intelligent DC breaking and intelligent AC-DC terminal temperature monitoring functions to improve system safety performance. Combined with the rich online O& M tools provided by the Solis cloud platform, it can effectively reduce O& M costs, simplify O& M, and improve system efficiency. This inverter provides more efficient, safe, intelligent, and economical high-power inverter solutions for C& I PV systems.

DC side supports "Y" connector

Supports export power control

Power line communication (PLC) (optional)

AFCI protection, proactively reduces fire risk

Intelligent string monitoring, smart I-V curve scan

Remote firmware upgrade with simple operation

Globally recognised branded componentry for longer life

Night time PID recovery function, increases overall system yield (optional)

Single MPPT maximum current 54A, perfectly match large current bifacial modules

The S6-GC3P(80-100)K07-LV-ND three-phase string inverter is the representative product of the new generation of Solis Cu0026 I solutions. With an MPPT current of up to 54A, it is perfect for all 182/210mm high-power PV modules and supports more than a 150% DC/AC ratio, bringing more yield. It features intelligent DC breaking and intelligent AC-DC terminal temperature monitoring functions to improve system safety performance. Combined with the rich online Ou0026 M tools provided by the Solis cloud platform, it can effectively reduce Ou0026 M costs, simplify Ou0026 M, and improve system efficiency. This inverter provides more efficient, safe, intelligent, and economical high-power inverter solutions for Cu0026 I PV systems.
