Discover the best 3-Phase Hybrid and Grid-Tied Inverters for your Residential or Commercial solar setup in South Africa. Our top-quality inverters offer affordable prices and excellent specifications to meet your power needs.

Hybrid inverters are the most sought-after inverters on the market today due to their unique abilities. They efficiently blend power from all available sources, including solar panels, batteries, and the grid, ensuring your home or business is always powered using freely produced or stored solar power first.

Grid-Tied Inverters require an active grid connection to function and are ideal for homes or businesses that use the majority of their electricity during the day. They supplement your daily electricity usage with solar power, drastically reducing your bills, and allow you to feed excess solar power back into the grid.

Determining the right inverter size for your needs is easy. Simply divide your average monthly electricity bill by 2.2 (the average price per kW), then divide the result by 30 (days in a month) to get your daily usage in kW. Finally, divide your daily usage by 5.5 (the hours in the day that you produce the most) to calculate your production needs.

3 phase solar inverter price south africa

Residential inverters typically range from 3kW to 10kW in size, with prices between R18,500.00 and R44,000.00 for Hybrid Inverters.
