

350 kWh energy storage inverter

350 kWh energy storage inverter

The SG350HX-US is a three-phase inverter designed for utility-scale applications, ...

PLEASE NOTE: Canadian Solar does not sell your information for monetary consideration. For details on information collected and used, please review our Privacy Policy. For any specific request around your data please use contact details as mentioned in the Privacy Policy.

Solis S6-GU350K-EHV three-phase PV inverters with a power of 350kW, 1500V DC input and 800 VAC output are designed to provide a more cost-effective adaptive solution for utility PV projects. It has maximum efficiency of up to 99%, with 12/16 MPPTs and 32 inputs, the string current is 20A, with perfectly matching efficient high-power PV module. Optimized DC, AC interface, and the PLC communication mode is matched to effectively reduce the investment cost of PV projects. it offers protection level up to IP66, making the PV plant safer and more stable. High-precision strings monitoring and I-V curve scanning effectively improve plant O& M efficiency and reduce subsequent O& M costs.

Solis S6-GU350K-EHV three-phase PV inverters with a power of 350kW, 1500V DC input and 800 VAC output are designed to provide a more cost-effective adaptive solution for utility PV projects. It has maximum efficiency of up to 99%, with 12/16 MPPTs and 32 inputs, the string current is 20A, with perfectly matching efficient high-power PV module. Optimized DC, AC interface, and the PLC communication mode is matched to effectively reduce the investment cost of PV projects. it offers protection level up to IP66, making the PV plant safer and more stable. High-precision strings monitoring and I-V curve scanning effectively improve plant Ou0026 M efficiency and reduce subsequent Ou0026 M costs.
