Over the last five decades, Triveni Turbine Limited (TTL) has delivered steam turbine solutions making it one of the most reliable companies in the world across 6 continents. We design, develop and deliver advanced technology Steam Turbine Generators (STGs) up to 100 MWe range for power generation and combined heat & power generation applications across a broad spectrum of industries.

For CHP and Power Generation, we manufacture Backpressure and Condensing type of steam turbine generators that work across a wide range of pressure and flow applications with a choice of Impulse and Reaction technology to meet the growing customer requirements...

We offer a wide range of API-compliant steam turbines from 5 kW and up to 100 MWe in Backpressure and Condensing types suitable for various drives and power generation applications in Chemicals, Petrochemicals, Petroleum Refineries and Fertilizer industries. Our API-compliant...

We offer SMART (Sustainable Modularly Arranged Pressure Reducing Turbines) units which are essentially Backpressure Steam Turbines Generators (STG) and serve the same purpose as pressure-reducing stations while generating additional electricity by converting steam energy into electrical energy.

Every payment you make on Alibaba is secured with strict SSL encryption and PCI DSS data protection protocols

Claim a refund if your order is missing or arrives with product issues, plus free local returns for defects on qualifying purchases

In the event of any inconsistencies or discrepancies between the English version and other translated versions of the terms and conditions set forth above, the English version shall prevail.
