

580 kWh energy storage battery reviews

580 kWh energy storage battery reviews

German battery manufacturer sonnen opened its doors in 2010 and quickly became the breakout star of the German energy storage market with its cutting-edge battery solutions.

The company's hometown success led to its expansion into the U.S. market in 2015. Since then, sonnen has become synonymous with reliable energy storage and is a popular brand from the U.S. all the way to Australia.

The current batteries from sonnen are a great option for most homeowners interested in battery storage, especially if they want a battery they can use daily. Let's look at what sonnen batteries offer, from features to price, and how they stack up to other popular batteries.

sonnen offers two residential solar batteries: the sonnenCore+ and sonnenEvo.

The sonnenCore+ is indoor rated, while the sonnenEvo is outdoor rated.

Both sonnen batteries are good options for homeowners looking for a daily-use battery to avoid peak pricing, participate in a virtual power plant, or for those who don't have net metering.

The sonnenCore+ doesn't have all of the ecoLinX's advanced features, but it is a solid battery that is a great option for the majority of homeowners.

Batteries from sonnen are average performers but come with an excellent warranty.

What sets sonnen apart? It's not just about the quality; it's about longevity. With an impressive 10-year, 10,000-cycle warranty, sonnen's commitment to durability is unmatched. The confidence in their product is further bolstered by the company's reputation and financial performance, assuring homeowners that they'll be there to honor every warranty promise.

While sonnen might not be the ideal fit for those aiming to power an entire household off-grid or energy-intensive appliances like air conditioners, it's a solid solution for the majority of homeowners. The capacity and power packed into a sonnen battery are sufficient to navigate expensive time-of-use rates and keep crucial appliances running during power outages.
