The Centre started effectively in 1982 along with the other Centres in the Country which are funded directly by the Federal Government. It is designed to be a Centre of excellence for research, development, dissemination and training in renewable, alternative and other energy technologies. It is presently active in the areas of Solar, Biomass and Coal energy utilization, energy consumption and energy policy studies. The Centre is presently housed in a multi-purpose building consisting of seven offices, a small laboratory, small mechanical and electrical workshops, a library, a seminar room and a conference centre.

Some of the specialized facilities include a computerized solar collector test rig with an attached meteorological station, and classification of wood. There is also a photo-type-photo-voltaic system for light energy. Projects supported by the Centre typically have been executed so far in collaboration with staff of mechanical engineering, agricultural engineering, and physics, statistics, economics and sociology departments of the University. The Centre welcomes project proposals by interested staff of all disciplines.

The National Center for Energy Research and Development, University of Nigeria, Nsukka, Energy Commission of Nigeria, Abuja, in collaboration with the German International Cooperation (GIZ) is organizing the 4th International Conference/ Training Workshop on Energy for Sustainable Development in Africa. The Conference will take place between 20th and 22nd May, 2020, while the training Workshop on

Abuja solar energy research and development

Solar PV Installation (SPVI) holds from 4th to 22nd May, 2020. The theme for the Conference is Energy Solutions for Attainment of Sustainable Development Goals in Africa.

You are cordially invited to the conference as scheduled.
