

Athens solar incentives

Athens solar incentives

You'll pay an average of \$12,952 to install a 5 kilowatt solar panel system in Athens, GA, before incentives.

The federal investment tax credit (ITC) lowers that price by 30% of all your solar equipment and installation costs.

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions. We have:

Sourced the majority of our data from hundreds of thousands of quotes through our own marketplace.

Incorporated third-party data and information from primary sources, government agencies, educational institutions, peer-reviewed research, or well-researched nonprofit organizations.

Built our own database and rating system for solar equipment, including solar panels, inverters, and batteries.

We won't charge you anything to get quotes through our marketplace. Instead, installers and other service providers pay us a small fee to participate after we vet them for reliability and suitability. To learn more, read about how we make money, our Dispute Resolution Service, and our Editorial Guidelines.

As of November 2024, the average solar panel system costs \$2.59/W including installation in Athens, GA. For a 5 kW installation, this comes out to about \$12,952 before incentives, though prices range from \$11,009 to \$14,895. After the federal tax credit, the average price drops by 30%.

You'll probably pay even less than what we show here. It doesn't include the federal ITC or Athens, GA state incentives, which will lower this price by at least a few thousand dollars.

It may seem obvious but larger solar panel systems cost more money. We use cost per watt (\$/W) so you can easily compare quotes, controlling for slight variations in system size.

While a 5 kW system will only cost you \$12,952 in Athens, GA, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill.

Solar panels are worth it in most areas, including Athens, GA. Certain factors, including the cost of electricity, incentives, climate, and the angle at which the sun hits your roof impact how quickly you break even on your investment relative to other areas around the U.S.
