

Battery management system 600 kWh

Battery management system 600 kWh

„??,????,?,? ...

Introducing the Deye GE-F60 Series, a state-of-the-art energy storage solution designed for both residential and commercial applications. This series boasts a robust Lithium Iron Phosphate (LFP) battery system, ensuring safety, reliability, and longevity. With its advanced features and high-performance capabilities, the GE-F60 Series is the perfect choice for those seeking a sustainable and efficient power management system.

The Deye GE-F60 Series represents the pinnacle of energy storage technology, offering unparalleled safety, efficiency, and scalability. With its comprehensive set of features and robust design, it is an ideal choice for anyone looking to enhance their energy independence and contribute to a more sustainable future.

Deye GE-F60(New) Datasheet

300 kWh battery is an all-in-one energy storage system popular for industrial and commercial use. Customizable designs allow for different battery capacities, like 100 kWh 250 kWh, 400 kWh, 500 kWh, 600 kWh, 1000 kWh, and more.

Equipped with a battery management system, temperature control system, and intelligent controller, we ensure quality through strict testing before delivery, ensuring safe and stable operation.

It can be used in solar power system, hydro, and wind power systems to store energy and provide power for industries and businesses with renewable energy. Plus, it can take advantage of price differences to charge and discharge electricity during peak and off-peak hours, earning revenue from utility companies.

Safety & Reliability

Cost-Effective & High Efficiency

High compatibility: It can be equipped with most off-grid inverters and mixed-grid inverters, and some brands need to provide communication protocols. It can be equipped with all kinds of power equipment.

Warranty: The warranty time of the battery is 8 years. During the warranty period, we will provide free battery firmware upgrade, battery troubleshooting and repair. If the battery malfunctions after the warranty period, we still provide free diagnostic service and paid replacement parts.

Integrated customized solution: the battery cabinet can be customized, PCS, EMS, BMS, solar inverter, solar charger controller, battery bank, etc. can be placed in the same cabinet, integrated design, higher degree of

Battery management system 600 kWh

integration, more convenient to monitor and manage.
