The Manager30 is the battery management system that knows how to put you in charge. The Manager30 is a state of the art battery management unit designed to charge and maintain auxiliary batteries by incorporating AC, DC and solar inputs. It is ideal for 12v canopies, recreational vehicles, RV and camper trailers with multiple battery banks. With a MPPT solar regulator, battery isolator, remote battery monitor and more, it operates like six products in one. Plus, this REDARC battery system works with lead acid batteries, gel, calcium, AGM and lithium ion batteries - providing a complete battery charging and maintenance solution.

CHOOSING THE RIGHT CHARGER FOR YOUR DUAL BATTERY SYSTEMWe're talking all things battery charging. Choosing the right charger for your dual battery system can be daunting, but we're breaking down all the different types and the setups they're perfect for.

THE BASICS OF BATTERY MONITORINGThere is a never-ending list of gadgets available for overland and recreational vehicles that become more a question of priority (which should I do first?) rather than one of necessity (do I need it at all?). Dual battery systems, for most people, definitely land on the required and high priority list.

BCDC VS MANAGER30 GUIDEStaying off-grid can be super easy with the right equipment. Here at REDARC, we have taken it back to basics to explain our Manager30 and BCDC range, to keep you connected and fully charged up!

Sign up for the REDARC newsletter to stay up to date with the tips, technical information and product releases.

The next generation Manager30 S3 model is the complete battery management system for charging auxiliary batteries used in recreational automotive and marine applications. The dual battery system incorporates AC, DC and solar inputs to achieve the best charge for an auxiliary battery.

Developed with ease of installation in mind, The Manager30 is compatible with all vehicles and alternator systems including variable voltage alternators.

Battery management systems australia

Whether you're charging Lead Acid, Gel, Calcium, AGM or Lithium Iron Phosphate batteries, The Manager30 represents a complete DC to DC charging and maintenance solution. If you're charging one auxiliary battery or more, The Manager30 will ensure they're always fully charged, providing peace of mind when battery charge provides the power source for the comforts of home whilst travelling around Australia.

The Manager30 operates like 6 separate products, it charges an auxiliary battery from the vehicle while on the move, it's a 240 volt charger, a solar regulator, a battery isolator, a load disconnect controller, all with a remote battery monitor, making it market leading.
