After 1.2 years of usage, the scooter only gives 10 Km milage. It gets switched off when the battery level is 80%. Battery quality is worse. Service for 3 months no proper response still having issues not able to use the vehicle, although 2 years warranty is there for the battery. Have sent several emails and made several phone calls to customer service no one gives a responsible answerNot worth to buy, other brands are proving battery replacement in 2 days and also provide spare battery. Do you want to waste your time and money?

Nope, but i wouldnt recommend BattRE unfortunately own one myself

For the availability, we would suggest you to please connect with the nearest authorized dealer in your city as it depends on their stock book. Follow the link and select your desired city for dealership details.

Simple Energy has equipped the Simple One with LED headlights, a 7-inch instrument console, and Bluetooth navigation. Moreover, you can also take phone calls, listen to music, and even store documents. Not just that, the Simple One also gets OTA updates, geo-fencing, a tyre pressure monitoring system and vehicle tracking among other things. Connectivity provisions include a 4G LTE sim and Bluetooth.

Describes how the engine is initiated. Most petrol bikes use electric starters, kick starters, or both, to
