

Belgrade electric vehicle range

If we take into account that a large number of new electric vehicles can travel up to 450 km with a single battery charge, such vehicles would fully satisfy the wishes related to the range of electric vehicles of almost 83% of respondents according to the results of the survey.

Lithium is a strategically valuable metal needed for electric vehicle batteries, making it key for helping Germany's flagship automotive sector shift to greener production.

It could be a boon for a continent focused on transitioning to electric vehicles to cut emissions, and for mining giant Rio Tinto, guaranteed profits.

The CMS Belgrade Energy Team has prepared a position paper outlining steps to be implemented by the Serbian government in order to increase both the popularity and availability of EVs in the Serbian automotive market.

President Aleksandar Vucic said at the opening of Rivian technology center in Belgrade on Thursday that Serbia is the only European country that managed to attract the electric vehicle maker.

Vucic said that the Serbian authorities invested effort to bring Rivian in for more than a year. "I saw young motivated people who are well paid and who will stay here," he said. According to the president, Serbia-US trade will total 1.4 billion Dollars this year, or 33 percent more than in 2021.

US Ambassador Christopher Hill told the ceremony that the company fits into Serbian culture while Rivian VP Software Development Wassym Bensaid said that the company got support from the authorities to come to Serbia adding that Rivian chose Belgrade with its active technology scene because it needs the best engineers.

He studied periodical journalism at the London College of Printing (now called the London College of Communication), and also has a Masters Degree in automotive design from Coventry University.
