In this EcoWatch guide on the best solar panels for homes, you'll learn:

We work with a panel of solar experts to create unbiased reviews that empower you to make the right choice for your home. No other site has covered renewables as long as us, which means we have more data and insider information than other sites. Our rankings are never affected by revenue or partnerships.

Note: In July 2024, SunPower notified dealers it would be halting all new shipments and project installations. The company also noted it would "no longer be supporting new Leases and PPA sales nor new project installations of these financing options."

Most solar panel manufacturers produce photovoltaic (PV) panels for residential use, but the options aren't all created equal. Each brand has a different efficiency level, rate of degradation, durability and more, so choosing the best option for your solar project can be quite confusing. To make matters worse, opting for the wrong brand could cut into your energy savings over time.

In this article, we'll be discussing the top five best solar panels for homes, and we'll explain why each is a great option for your rooftop solar system. We'll also explain what to look for in a high-performance panel to help you pick the best one for your needs. You can also refer to our review of the top solar panel installers if you're searching for the best provider for your home.

The four solar panel companies below are the manufacturers we've identified as the best in the industry for home PV panels:

We'll explain why we feel these panels are the best in the solar industry for home renewable energy systems below. Each panel includes a drop-down menu with additional information.

Of all of the panel models from the manufacturers mentioned above, there are two that stand out for providing outstanding performance and overall value. These include the Maxeon 6 panels and the Q.PEAK DUO BLK ML-G10+ from Q Cells. These both provide above-average production and savings without compromising on overall quality.

The table below includes a quick look at these two panel options and how they stack up against one another.

Q Cells, which is a brand manufactured by Hanwha, is the best solar company for value, in our opinion. Despite being more affordable than most other tier-one solar panel brands at around \$3.00 per watt, its panels

## Best residential solar power system

still have above-average efficiency ratings and performance specs. They're not quite as impressive in their durability as some other options, but they're still an outstanding choice for many solar customers.

We recommend Q Cells for solar customers who want the best performance per dollar.
