Bioenno Power offers a comprehensive range of LiFePO4 batteries specifically optimized for ham radio applications. Our batteries serve as superior replacements for traditional lead-acid and NiMh batteries, delivering enhanced performance in a lighter, more efficient package.

Lightweight and Powerful: Our LiFePO4 batteries weigh less than half of their traditional counterparts, yet offer significantly improved performance. This makes them ideal for portable ham radio setups, including 100 Watt HF SSB radios, ensuring true portability without the need for heavy, expensive battery boosting equipment.

Extended Runtime: Experience markedly longer operational times with our batteries. Designed for continuous use, they support extended periods of communication, making them perfect for field days, emergency situations, and everyday use.

Durable and Reliable: Built with advanced Protection Circuit Module (PCM) technology, our batteries ensure internal cell balancing and safeguard against overcurrent, under-voltage, over-voltage, and short-circuiting, providing a reliable power source for your ham radio equipment.

Duty Cycle Charts: Utilize our 2080 Standard Duty Chart and 5050 Field Day Duty Chart to understand the optimal battery usage for different scenarios.

Specifications Comparison Chart: Compare our batteries' specifications to choose the best option for your needs.

Solar How-To Guide: Learn how to integrate our batteries with solar setups for sustainable, off-grid power solutions.

Radio-Battery Compatibility Charts: Check compatibility with popular ham radio brands such as Yaesu, Icom, Elecraft, Kenwood, Flex Radio, Powerwerx, Alinco, and TYT.

USA Assembly and Support: Our batteries are assembled in the USA, with dedicated USA-based customer support and service to assist you with any queries or issues.

Over a Decade of Excellence: Since 2010, Bioenno Power has been a trusted name in the industry, providing
