To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

1). detection and protection of over-charge, over-discharge. 2). detection short-circuit of charging port, with two layers protection against over-voltage when charging. 3). voltage balancing. 4). detection of wires disconnection. 5). With Mobile phone (Android system 4.3 Version or higher) operation software system to manage the detecting the battery working status and some parameters setting. (with Bluetooth) 6). With PC operation to manage the detecting the battery working status and some parameters setting. (with UART module)

The time showed in the "Shipping Method" means the transport time, not including the handling time which takes 1-7 days usually.

1. Battery/ Products with battery

Handling time: 3-7 days
Thanks for purchasing our product. The battery is a special product which needs several cycle tests before delivery, so production and test time need about 3-7 days. Due to the express shipping regulation of express company for the risky item like the battery, we ship the battery separately from other goods and via special air method to the destination country, then to your door via UPS, FedEx, or some other express company. Noted! Handling time of E-bike or electric bike kits please check on their product page.

(not include the Colony or dependency islands)

18-35 days (the UPS or DPD or other Logistics companies could pick it up after completing the customs

Bms 10s 36v 30a

clearance, it may take 10-25 days before picking up)

(Delivered Duty Paid for the following countries:
