Brunei solar energy companies

RAB Global Green Sdn Berhad main objective is not only to facilitate a platform for the manufacturing of renewable energy products within Brunei Darussalam but to enable working together with the International community to create sustainable and ecologically friendly products.

Our economic development depends on the availability of energy, especially in supporting the Global trend of development priorities to build renewable energy infrastructures.

In Brunei Darussalam, one of the key goals of development is to improve the nation's competitiveness in the renewable energy sector and to investigate the opportunity to reduce fossil energy and create more opportunities within the green energy sector. The biofuel and biochemical industries are a group of industries that are anticipated to see rapid growth in the future and are two industries that can easily be integrated with current and pre-existing industries within the Nation.

We believe that it is important to source and develop renewable energy products based on consumers' everyday needs, with affordable prices and provide functional, sustainable solutions. We want to make Renewable Energy available in both Villages and Cities alike as well as creating a viable economic Industry.

We're pleased to be welcoming customers to join us.

To promote awareness, education and create affordable and consumer centric solar products that is easy to use with high ease of accessibility and portability to all " walks of life" of all ages.
