

## Brussels energy storage for resilience

During the event the mission and strategy of the newly created Energy Storage Coalition will be presented.

The Coalition's Partners will explain how energy storage can provide the flexibility renewables require to ensure Europe meets its decarbonisation targets, strengthens energy resilience, and achieves lower energy prices.

Representatives of European Institutions, together with representatives of the energy storage and renewables sectors, will discuss how the new Electricity Market Design can address the barriers to the deployment of energy storage technologies in Europe.

A cocktail reception will follow.

### Welcome and Introduction

Doriana Forleo, Head of Communications, Energy Storage Coalition

Kadri Simson, Commissioner for Energy, European Commission

### Panel Discussion Followed by Q& A: Electricity Market Design for More Storage Deployment

Moderator: Naomi Chevillard, Head of Regulatory Affairs, SolarPower Europe

Catharina Sikow-Magny, Director Green Transition and Energy System Integration, Directorate General for Energy, European Commission

On 4 May 2023 the Energy Storage Coalition, a new organisation aimed at accelerating the decarbonisation of the European energy system by increasing the deployment of sustainable and clean energy storage solutions to support renewables, hosted its launch event.

The event was attended by over 150 policymakers, industry and associations representatives. It provided an opportunity to discuss how the upcoming EU Electricity Market Design can address today's barriers to the deployment and use of energy storage technologies in Europe.
