

# Bucharest renewable electricity

Bucharest renewable electricity

Climate Changes. Renewable sources. Empowered Customers. Distributed generation. Diverse Producers. Digitalized Grids. Electrification of consumption. Storage. Free markets. If there's one word that describes today's energy world, it's COMPLEXITY.

What we see today is a major change in the energy Sources that power the planet, the Technologies used and in Who produces energy. We're witnessing a PowerShift. So, What's the future?

RWEA, RPIA, in partnership with the leading renewable energy European associations - WindEurope and SolarPower Europe - invite you on October 29-30 in Bucharest to the PowerShift Summit. Two full days of interactive discussions cross-energy sector and cross-economic sector, national workshops, expo and networking opportunities.

Join us and become part of the answers!

Promote your brand to a wide spectrum of local and international stakeholders
