Cameroon energy storage for electric vehicles

The system facilitates several applications such as air-conditioning, heating, electric power supply for electric cars, building load & national grid, hydrogen for internal combustion engines...

Yaounde, Cameroon - In a significant move towards embracing sustainable transportation, Cameroon is taking definitive steps to integrate electric vehicles (EVs) into its national fleet. The initiative aims to align the country with other African nations already benefiting from this green technology, which offers reduced environmental ...

Norway-headquartered renewable energy company Scatec has brought online two solar-plus-storage hybrid resources projects in Cameroon, Africa. The two projects total 36MW of solar PV generation capacity paired with 20MW/19MWh of battery energy storage system (BESS) technology at the cities of Maroua and Guider, in the Grand North region of ...

Norway-headquartered renewable energy company Scatec will add 28.6MW of solar PV and 19.2MWh of battery energy storage systems (BESS) to projects in Cameroon, via a local subsidiary. Subsidiary Release has signed two new lease agreements with ENEO, a partially state-owned electricity company in Cameroon, to expand its Maroua and Guider projects ...

Electric vehicles (EVs) are critical to reducing greenhouse gas emissions and advancing sustainable transportation. This study develops a Modular Multilevel Converter-based Hybrid Energy Storage System (HESS) integrating lithium-ion batteries (BT) and supercapacitors (SC) to enhance energy management and EV performance.

Norway-headquartered renewable energy company Scatec will add 28.6MW of solar PV and 19.2MWh of battery energy storage systems (BESS) to projects in Cameroon, via a local subsidiary.

Subsidiary Release has signed two new lease agreements with ENEO, a partially state-owned electricity company in Cameroon, to expand its Maroua and Guider projects, which it commissioned last September.

The expansion will increase the size of Release's Cameroonian portfolio to 64.6MW of solar capacity, alongside 38.2MWh of batteries, and follows a US\$26 million investment made into the projects.

"This extension is a testimony to the success of the initial projects and to the benefits provided by our innovative offering," said Release CEO Hans Olav Kvalvaag. "By increasing the installed capacity in the country, we are reaffirming our collaboration with ENEO and our commitment to Cameroon as a key market for our solutions."

Cameroon energy storage for electric vehicles

The two projects were initially developed alongside African engineering, procurement and construction (EPC) firms Izuba Energy and Sphinx Energy. The next round of expansion work will be partially funded by Climate Fund Managers, a Dutch investment group, which reached an agreement to provide Release with US\$102 million in financing last July, in exchange for a 32% ownership stake.
