Intelligent insights & conversations with global power industry professionals

This special interest group is for professionals to connect and discuss all types of carbon-free power alternatives, including nuclear, renewable, tidal and more.

Bamidele Faparusi is a highly experienced engineer with over 19 years of professional experience in renewable energy, solar PV systems, power systems integration, service provision, project...

Great article Bami. Solar with battery storage can cover all of the needs for energy in Africa. It is also the lowest cost. It can even be used in remote areas not yet connected to a GRID.

Thank you, Jim, off-grid communities requires the very basic energy that solar home system can supply. so you are right, solar with a little battery storage is all that is needed to impact millions of people in Africa.

Love this post - thanks for sharing with the community.

The Energy Central Power Industry Network® is based on one core idea - power industry professionals helping each other and advancing the industry by sharing and learning from each other.

If you have an experience or insight to share or have learned something from a conference or seminar, your peers and colleagues on Energy Central want to hear about it. It's also easy to share a link to an article you've liked or an industry resource that you think would be helpful.
