Clean electricity yemen

Washington, June 30, 2022 -- The World Bank has approved an additional ...

From supplying solar panels to medical supplies, UNOPS is always looking for new suppliers.

Discover our latest press releases, statements, publications and other resources to learn more about our work.

We're committed to operating with transparency and accountability, and building trust between UNOPS and our governing bodies, our partners and the communities we serve.

Renewable energy solutions are providing a more reliable source of electricity for millions of people in Yemen - and improving their access to essential services.

Solar power systems energize 220 health facilities and 23 COVID-19 isolation units, improving health outcomes.

234 schools powered with solar energy improve learning environments for children.

Solar power systems installed in 40 water wells provide improved access clean water to households.

We have been providing services with great satisfaction since the installation of solar energy at the health centre, where life has now returned. The equipment is now working. We can now spare people the hardship of having to travel to health centres further away.

About the project

Phase II of the Yemen Emergency Electricity Access Project is a four-year project implemented by UNOPS with \$100 million in financing from the World Bank Group's International Development Association (IDA). The project aims to improve access to energy for people living in rural and peri-urban areas across Yemen. [Read more here.](#) Phase I of the project, implemented by UNOPS and funded through a \$50 million IDA grant, ran from 2018-2022. [Read more here.](#)

Amman, Jordan, 12 May 2024 -The United Nations Development Programme (UNDP) in Yemen has released two new strategies to inform private sector engagement and renewable energy investment in Yemen. The strategies, launched in Amman today with a set of expert panel discussions, consider the Yemeni private sector as a partner in key areas within the context of recovery and reconstruction, including provision of reliable, clean energy.
