Intelligent insights & conversations with global power industry professionals

This group brings together the best thinkers on energy and climate. Join us for smart, insightful posts and conversations about where the energy industry is and where it is going.

Hemberth is an attorney and partner at OGE Legal Services. He is a Master's Degree in Renewable Energies. He is a specialist in electricity and gas regulation, energy mining law, domestic...

Seems like a good comprehensive backdrop to allow EVs to grow in Colombia-- what's the start of the Colombian EV market today? How does it compare to its neighbors in terms of market penetration?

The public transport systems are a good reference for the fact that in Colombia the electric mobility started. In the main cities, electric buses started to be used. Compared to other Latin American countries, Colombia is in an initial phase and is gaining strength from its regulatory framework.

Glad to hear it! I wonder if that means other Latin American countries will look to their regulatory framework as a good model to use for their own electrification process

The Energy Central Power Industry Network® is based on one core idea - power industry professionals helping each other and advancing the industry by sharing and learning from each other.

If you have an experience or insight to share or have learned something from a conference or seminar, your peers and colleagues on Energy Central want to hear about it. It's also easy to share a link to an article you've liked or an industry resource that you think would be helpful.
