

Companies that recycle lithium batteries

Global Top 10 Lithium-ion Battery Recycling Companies [2023]

Ecobat Casa Grande will repurpose end-of-life li-ion batteries through diagnostics, sorting, shredding, and material separation. The company says it will launch in the third quarter of this...

In this blog, we will circuit around the lithium-ion batteries recycling market, what are the factors affecting the growth, the major companies competing in the market, and what the future holds for it.

Global stock of electric vehicles (EVs) could reach 245 million units by 2030, according to the International Energy Agency. While EVs emit less CO₂, their batteries are tough to recycle. Made from cobalt, lithium and nickel, the mining of these raw materials raises ethical and environmental concerns. Creating a circular supply chain by ...

We are able to safely receive and recycle all types of lithium-ion batteries regardless of form factor and state of charge, as well as all types of battery manufacturing scrap. We can also process damaged, defective or recalled batteries.

Battery recycling giant Ecobat is building its first lithium-ion battery recycling facility in North America - its third li-ion battery recycling facility globally.

It's a huge international company - it's got sites in Europe, southern Africa, and the US. It has 12 secondary smelting facilities, a primary smelting facility, three lithium-focused facilities, a collection truck fleet, and 65,000 battery collection points.

We are thrilled to grow our global lithium-ion battery recycling footprint with a new facility in Casa Grande, Arizona.

This facility, like our lithium-ion battery recycling facilities in Germany and the United Kingdom, represents a significant milestone in Ecobat's strategy to grow our lithium-ion battery recycling business to a scale, similar to our world-leading lead battery recycling business.

The new facility in Casa Grande, Arizona, will initially produce around 10,000 tons of recycled material annually, and there are plans to expand capacity to meet the growing demand in the shift to electrification.

Ecobat Casa Grande will repurpose end-of-life li-ion batteries through diagnostics, sorting, shredding, and material separation. The company says it will launch in the third quarter of this year.

Companies that recycle lithium batteries

In 2021, Ecobat's lead battery recycling business fully recycled 70 million car batteries.
