

Custom lithium 200ah

Custom lithium 200ah

Maximise space with Custom Lithium's range of Australian-made LiFePO4 Ultra ...

Explore the slim lithium 200Ah battery, designed for compact installations while ...

At Seastar Battery, we specialize in high-performance custom lithium batteries designed to meet the unique energy requirements of our clients.

Our Custom Lithium 200Ah Battery is engineered specifically for compact applications in 4x4s, utes, and vans, delivering reliable power while optimizing space.

High capacity for long-lasting power; customizable voltage from 12V to 48V; durable in extreme environments; supports fast charging; modular design for easy expansion;

Built-in BMS for safety; intelligent temperature control; efficient charge and discharge; suitable for parallel and series configurations.

Common options include LiFePO4 for safety and long life, NCM/NCA for high energy density, and LTO for fast charging and extended lifespan. Cell type is chosen based on specific application needs.

Please note that the final cost depends on the customized service you require, the specifications of the raw materials used, the relevant national laws, and the distance of transportation.

Estimated Cost Analysis for LiFePO4 Battery 12.8V 100AH Imports from China

Tailored Solutions: We provide fully customizable lithium battery solutions based on your specific application, ensuring perfect fit and performance.

Advanced BMS Technology: Ensures long battery life, stable performance, and safety.

High Energy Density: Our custom designs maximize energy storage capacity in a compact form factor.
