

# Cve 2022 41089 download

Cve 2022 41089 download

,??? 2000? ? Windows DNA,,,? ?...

Release Date:December 13, 2022

Version: Framework 3.5 and 4.8

The December 13, 2022 update for Windows 10, version 1809 and Windows Server 2019 includes cumulative reliability improvements in Framework 3.5 and 4.8. We recommend that you apply this update as part of your regular maintenance routines. Before you install this update, see the Prerequisites and Restart requirement sections.

This security update addresses a vulnerability where restricted mode is triggered for the parsing of XPS files, preventing gadget chains which could allow remote code execution on an affected system. For more information please see CVE-2022-41089.

## Quality and Reliability Improvements

There are no new Quality and Reliability Improvements in this update.

The following articles contain additional information about this update as it relates to individual product versions.

5021085 Description of the Cumulative Update for Framework 3.5, 4.7.2 and 4.8 for Windows 10, version 1809 and Windows Server 2019 (KB5021085)

After installing this update, WPF apps may have a change in behavior. For more information about this issue, see KB5022083

This issue has been resolved in the June 13, 2023 Security and Quality Rollup and Cumulative Update.

If you used any workaround or mitigations for this issue, they are no longer needed, and we recommend you remove them. To remove workaround review the workaround or alternative workaround which was applied for instructions. The workaround should be removed prior to installing the June update.
