7.1.1 Access to electricity (% population) 7.1.2 Access to clean cooking (% population) 7.2.1 Renewable energy (% TFEC) ... Dominican Republic Net-Metering Regulation 2011 Law 57-07 on Incentives for Development of Renewable Energy Sources and its Special Regimes ENERGY AND EMISSIONS

This document was developed by the National Renewable Energy Laboratory with support provided by the Caribbean Center for Renewable Energy and Energy Efficiency. The information included in this document is for general information purposes only.

The Dominican Republic (DR), with a population of 11 million people and 98% electricity coverage, has an interconnected national grid that supplied 21,170 gigawatt hours (GWh) net of electrical energy in 2023. Moderate projections estimate that annual demand will increase to around 30,000 GWh by 2030.

Santo Domingo, DR. According to the Performance Report of State Electricity Companies of the Ministry of Energy, the average price of purchase and sale of electric energy increased 29.4% and 11.4%, respectively, in January of 2022 compared to the same month of the previous year.

Dominican Republic: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Apply for financial support, or take part in programs that help innovative or growth-oriented firms, and underrepresented groups.
