Ecoflow lifepo4 review

Home » EcoFlow River 2 Max Tested & Reviewed

Disclaimer: EcoFlow sent this product to us for free for a review. That does not affect our opinion about the product. In this article, we list both what we like and dislike. Read more about this here.

100W USB C PD port, LiFePO4 batteries, WiFi/Bluetooth-support, four AC ports, fast charging, and the 1000W X-boost were some features that made me say yes when EcoFlow asked if I would like to review it.

I have a lot of good things to say about it, and by the end of this review I hope you feel you know the pros and cons of this product.

I'm going to start like I usually do by going over the features, before I list my opinions.

Table of Contents show Is The River 2 Max The Ultimate Mid-Size Power Station? Features Battery Capacity Inverter Ports Display Charging WiFi/Bluetooth UPS Size & Weight In The Box My Review What I Like What I Dislike Conclusion

The River 2 Max is rated at 512Wh (watt-hours).

To give you a rough estimate: A 512Wh battery will power a 50W device for almost 9 hours with a 85% inverter efficiency ($512\text{Wh}/50\text{W} \cdot 0.85 = 8.7$).

The battery chemistry used is LiFePO4 (LFP). These types of batteries are rated for up to 3000 cycles before reaching 80% capacity.

Usually, they're not as powerful as a household outlet though in terms of how many watts it can output continuously.

The pure sine wave inverter used in the River 2 Max is rated for up to 500W output, but with EcoFlow's X-boost features it can output up to 1000W with certain devices.
