

Electric vehicle charging riyadh

EVIQ, the Electric Vehicle Infrastructure Company, announces the launch of its inaugural electric vehicle fast-charging site, located at ROSHN Front in Riyadh (previously known as Riyadh Front). This is a key milestone for the new joint-venture company between the Public Investment Fund (PIF) and Saudi Electricity Company (SEC), and a positive step for the EV industry in the Kingdom.

The new site boasts two cutting-edge fast chargers, each with an output power of over 100 kW, which will offer free high-power charging to all EV users in Riyadh. The deployment of this technology heralds a new era of accessibility and convenience for the public, aligning with the Kingdom's Vision 2030 to drive the adoption of electric vehicles.

Mohammad Bakr Gazzaz, CEO of EVIQ, said: "This is a landmark moment for EVIQ, and a significant first achievement in our plans to deploy 5,000 fast chargers across 1,000 strategic locations around the Kingdom by 2030. The opening of our first site at ROSHN Front means that the public has access to the most advanced electric vehicle charging technology. These fast chargers will revolutionize public EV charging, allowing EV drivers to top-up their vehicles in a short period of time".

David Grover, CEO of ROSHN Group, said: "ROSHN Front is an iconic destination for Riyadh, with over 800,000 visitors each month, making it an ideal location to host EVIQ's first public EV charging facility. The adjacent SEDRA, which will eventually add 30,000 modern homes to Riyadh's housing stock, will also provide EV charging infrastructure throughout the capital's first humanized, integrated community. We are delighted to be working with EVIQ as part of our strategies of implementing cutting-edge technologies and partnering with best-in-class collaborators."

EV charging time is considered one of the key challenges that many EV owners are facing today, with a lack of high-power chargers in the KSA market today. This new fast-charging location is considered a positive step in the right direction towards solving this challenge and driving more confidence in the ownership and use of electric vehicles among the Saudi community.

Welcome to our webpage dedicated to electric vehicle (EV) charging stations in the vibrant city of Riyadh, Saudi Arabia. As EVs gain popularity, Riyadh has emerged as a leading city in the Middle East, embracing sustainable transportation. With its rapidly expanding network of charging stations, Riyadh offers a convenient and eco-friendly infrastructure for EV owners. Whether you are a resident or a visitor, this page will provide you with all the essential information to locate charging stations effortlessly.

PlugShare uses a color-coded system to convey charging station information:

No pins on the map? Unfortunately, Plugshare users haven't reported any charging stations.

To discover the charging fees for a particular location, click on the pin icon on the map. Look for the cost field, where you can find pricing information shared by other users who have charged there. In some cases, you may also find pricing details in the charger's description. Please be aware that for certain locations, pricing information may not be accessible.

To identify Tesla-compatible charging stations, simply click on a specific station pin on the map. Check for information about the available connectors; Tesla-compatible stations will typically list Tesla-specific connectors. You can also explore user reviews and comments for insights.

A station's score reflects the experience of users on a scale of 1 to 10, with 10 being the highest score. When a user reports a negative experience at a charging station, its score drops. When a user reports a positive experience, the station's score rises. A neutral comment or check-in does not affect the overall score. It is also worthwhile reading the comments on each location to get more insights into the reason behind each score. You can view PlugScores from the Station Summary icon on the map.
