Cape Town is investing R8.5 billion to transition their MyCiti bus system to completely electric, with a focus on reducing carbon emissions in the metro southeast regions. This is part of the city's commitment to sustainable development and environmental protection, along with supporting the Flex EV initiative in electrifying the taxi industry and national government investment allowances for EV production. Cape Town's visionary approach to eco-friendly transportation is leading the way for cities worldwide and shaping a cleaner, more sustainable future.

Cape Town is investing R8.5 billion in the growth of the MyCiti bus system, with plans to make it completely electric. The focus will be on the metro southeast regions, with the intent to reduce carbon emissions by 67 kilotonnes of carbon dioxide annually. The city is also supporting the Flex EV initiative in electrifying the taxi industry, and the national government is offering investment allowances for EV production. This demonstrates Cape Town's commitment to sustainable development and environmental protection.

At the epicentre of South Africa, Cape Town is preparing to make a significant stride into the next generation of sustainable transport. The expansive city has declared its plans to kick-start the Western Cape's most formidable electric vehicle initiative. A whopping R8.5 billion is earmarked for the growth of the MyCiti bus system, paving the way for a groundbreaking journey towards eco-friendly public transport.

Cape Town's Mayor, Geordin Hill-Lewis, made the inspiring announcement during Africa's Green Economy Summit. The summit, which took place from 21 to 23 February, was an apt setting for such a

The metro southeast regions, encompassing the vibrant neighbourhoods of Khayelitsha and Mitchells Plain, are the focus of this colossal transition. In Hill-Lewis's own words, "It will be completely electric. All of the buses on that route will be e-buses and that's an important shift for the city". This change represents not only an embrace of modernity but also an expression of environmental stewardship.
