

Electric vehicle policy Ljubljana

Elektro Ljubljana is one of the leading providers of charging services for electric vehicles in Slovenia. The knowledge and experience we have gathered over the years drive us to constantly improve our e-mobility services. You can find the latest information about the number and locations of our charging stations at

Within the framework of the 4th conference on e-mobility in municipalities, which took place in Brdo pri Kranju, Ljubljana was declared the best e-mobility city in Slovenia. We won based on the combined total of the grades given by an expert committee and the votes cast in an online survey.

Ljubljana's electric-powered vehicles referred to as Kavalirs (Gentle Helpers) are a free city centre public transport option friendly both to people and the environment. Kavalirs, mainly intended for the transport of the elderly, mobility-impaired people, and visitors, run around the pedestrianized historical city centre at a speed slow enough ...

Electromobility supported with numerous measures. The City of Ljubljana strives towards the principal aim of sustainable mobility in cities, namely, to replace the current traffic system with more energy-efficient, environment-friendly, space-saving and healthier forms of traffic in the city and the region.

Under Article 12 of the Ordinance on the Regulation of Traffic in the City of Ljubljana, a driver of an electric vehicle should mark the time of their arrival on the inside of the windscreen so that it is clearly visible and legible through the windscreen.
