What power to choose - Electricity Prices - Engie

As a prelude, it must be noted that the cost of electricity in Vanuatu is within the average of other small Pacific islands but that it is undeniable that the structural costs of producing, distributing and commercializing electricity in Efate are objectively high compared to the rest of the continental utilities.

ELECTRICITY RATES applicable from the 1st to the 31st of each month in accordance with the terms and condition relating to the Concessions for the production and supply of electricity in Port-Vila.

The tariff policy assures a solidarity mechanism between different customers of UNELCO concessions : EFATE, TANNA and MALEKULA

Electricity tariffs are determined on the basis of the conditions stipulated in the Concession Agreement between the Government of Vanuatu and UNELCO, international best practice in tariff determination, the investment plan and the socio-economic priorities of the Government.
