Electricity market trends santo domingo

Santo Domingo, DR. According to the Performance Report of State Electricity Companies of the Ministry of Energy, the average price of purchase and sale of electric energy increased 29.4% and 11.4%, respectively, in January of 2022 compared to the same month of the previous year.

-- Caribbean Energy 2025 will address the critical themes influencing the energy industry, including: -- Market trends and energy price outlooks -- Balancing renewable energy, energy storage, and investment for grid reliability -- The latest from electric power companies and developers across the Caribbean -- New policy directions and ...

Santo Domingo.-. The Dominican Republic has seen record levels of electricity consumption, with power demand peaking at 3,662.27 megawatts on Wednesday. This demand was fully met by the electrical system. Minister of Energy and Mines Antonio Almonte announced this milestone, noting that the country consumed 80 million kilowatt-hours (80 GWh) on ...

Electricity demand in the Dominican Republic has grown considerably since the early 1990s, at a yearly average of 10% between 1992 and 2003. Consumption is very close to the regional average, with annual per capita consumption of 1,349 kWh in 2003. [1] Total electricity sold in 2005 was 3.72 TWh. [8]

In 2014, the Dominican Republic's utility rates were approximately \$0.19 per kilowatt-hour (kWh),<sup>1</sup> below the regional average of \$0.33/kWh. Like many island nations, the Dominican Republic is highly dependent on imported fossil fuels, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.
