The Bundeskartellamt, the German Anti-Trust Authority, has published its fifth Market Power Report, which describes the conditions of competition in the generation of electricity, by analysing the market power situation in the generation and first-time sale of electricity in the period from 1 May 2023 to 30 April 2024.

According to this report, the German energy utility RWE remains the dominant player on the country's energy market. The power plants of RWE were found to have been indispensable for meeting electricity demand during the reporting period. The degree of RWE's indispensability (determined by the periods in which it would be possible for RWE to systematically increase market prices) remained at a level exceeding the threshold for the presumption of a dominant position, in contrast with the previous report where LEAG and EnBW were also close to the threshold but have now fallen significantly below it.

Enerdata's premium online information service provides up-to-date market reports on 110+ countries. The reports include valuable market data and analysis as well as a daily newsfeed, curated by our energy analysts, on the oil, gas, coal and power markets.

This user-friendly tool gives you the essentials about the domestic markets of your concern, including market structure, organisation, actors, projects and business perspectives.
