

Electricity regulations laos

The Law on Electricity (2017 Ed.) establishes specific standards in the administration, transmission, distribution and trade of electricity in line with the national social and economic growth of the Lao people. In particular, it sets out the principles to use the natural resource potentials in an economical and sustainable manner.

The main laws and policies that govern the electricity supply in Lao PDR are: The Electricity Law 1997, amended in 2012. This governs electricity generation and distribution in Lao PDR. It sets standards for the administration, production, distribution, transmission and imports/exports of electricity. The Power Sector Policy Statement 2001 aims ...

The Electricity Law was issued in 1997 and its purpose is to establish systematic standards in i.e. administration, production, transmission, distribution, and to manage the exports and imports through the most effective use of natural resources in pursuit of improving the national economy, society, and the living standards of the people.

The Law on Electricity determines the principles, rules and measures on the organization, operation, management and inspection of electrical activities for the high effectiveness of electricity generation and business operation with the aims to use the natural resource potentials in an economical and sustainable manner, to encourage the ...

Production of Electricity Article 24. Production of Electricity refers to a system that generates electrical energy through rotating devices caused by the force of water currents, winds, heat, or other sources. **Article 25. Conditions of Electricity Production** Electricity production shall have the following conditions: 1. use of modern equipment; 2. use of equipment friendly to environment; 3. compliance with standards and quality; 4. other conditions deemed necessary for such production.

Final Provisions Article 55: Administration The government of Lao People's Democratic Republic shall be the administrator of this law. **Article 56: Effectiveness** This law shall become effective after 90 days, from the date which the President of Lao People's Democratic Republic issues a Presidential Decree promulgating it. Persons or organizations who had obtained licenses prior to this law may continue such electricity enterprise. Private interests that may be in conflict with any provisions of this law shall be notified with the designated agencies within 180 days from the effective date of this law. Previous provisions or acts that are in conflict with this law shall be superseded.

Vientiane, 12 April 1997

President of the National Assembly

The Law on Electricity determines the principles, rules and measures on the organization, operation, management and inspection of electrical activities for the high effectiveness of electricity generation and business operation with the aims to use the natural resource potentials in economical and sustainable manner, to encourage the implementation of the national socio-economic development plan and to improve the living conditions of the multi-ethnic people
