

Electricity regulations suriname

Suriname's electric sector regulations are dependent on contractual agreements, which are based on the 1957 Brokopondo Agreement. The project Development of Renewable Energy, Energy Efficiency and Electrification of Suriname (SU-G1001) was initiated in 2013 to promote the use and development of renewable energy and energy efficiency in the ...

This is the Energy Report Card (ERC) for 2022 for Republic of Suriname. The ERC provides an overview of the energy sector performance, highlighting the following areas: o Installed Conventional and Renewable Power Generation Capacity o Annual Electricity Generation, from Conventional and Renewable Plants

Suriname, as a member of the Caribbean Community (CARICOM) has a target of 20%, 28% and 47% renewable electricity generation to be reached by 2017, 2022 and 2027 respectively. There is no legislative framework for electricity or renewable energy and Suriname is working on its development.

The EAS performs supervisory and steering tasks and duties aimed at establishing and promoting optimal availability, affordability and sustainability in the energy sector of Suriname. Furthermore, the EAS derives its duties and powers from various relevant laws and regulations, including the Electricity Act 2016 and derived State Decrees.

As of 2020, 52.9% of Suriname's electricity was generated from fossil fuels, 46.7% from hydro power, and 0.4% from solar energy.[1] Suriname aims to keep its share of electricity from renewable sources above 35% by 2030, according to the country's updated NDC (Nationally Determined Contribution) plan.[2]

Suriname pledged to not exceed 1.5 degrees Celsius above pre-industrial levels while also following a "cost-effective pathway to decarbonization of sustainable economic development."[3] Suriname plans to meet these goals by focusing on forests, electricity, agriculture, and transportation.[3]
