SolarGik offers smart PV tracker solutions that are modular, configurable, lightweight, and easy to install and maintain, which provide 20-25% more energy production than fixed-tilt panels.

Our trackers can be installed any place a fixed-tilt panel can be installed. Our "Master Control System" serves as a project-level SCADA/DCS system and knows how to calculate and balance all the relevant parameters (weather, project-specific data, wind, radiation, degradation, agricultural needs, etc).

enSights is a game-changer in renewable energy assets management, offering unparalleled intelligence for optimizing income & profits across all assets.

Our platform's deep understanding of energy big data, coupled with predictive analytics and machine learning, ensures peak performance and security for your renewable energy assets.

Experience the future with enSights - a user-friendly, fully automated solution that monitors, analyzes and controls your assets, and provides actionable insights and revenue-generating recommendations. With seamless connectivity to all customer's distributed mult...

Phinergy is a leading pioneer in metal-air technology, turning metals - namely aluminum and zinc - into a new way to store, transport and generate clean and affordable energy. Phinergy has overcome major scientific, technological and economic challenges in the field of metal-air, moving from technology to commercial products. Phinergy's aluminum-air technology releases the abundant energy contained in aluminium - the most abundant metal on Earth (8% of Earth's crust) - resulting in a clean, safe, cost-efficient, and fully recyclable energy source. Phinergy's aluminum-air technology provides o...

Renewable Energy is not stored. We found a way to efficiently and cheaply to do that. Energy storage. We envision a world where Renewable Energy is available when needed. Presently renewable energy is tied to when generated, resulting in lost revenues, unused energy, and instability in electrical grids. Our solution to enable Renewable Energy so it can be utilised when the market needs it is a new and unique storage solution.

We have developed a revolutionary new technology that takes water and efficiently separates it into hydrogen and oxygen gas thru the use of electromagnetic waves. O...

Standard Carbon technology provides a sustainable solution to climate change

MaterialsZone is a Materials Informatics Platform

Energy storage companies jerusalem

An organizational platform with all accumulated materials and products data that enables AI/ML assisted rapid development of new materials/products based on data-driven insights.

From materials data to better products, fasterAll the insights, all the data, one platform
