

Energy storage software 230 kWh

Energy storage software 230 kWh

,?,:?,,?,,?,...

The 100kW/230kWh liquid cooling energy storage system was independently designed and developed by EVB. It is widely used in the energy storage field with grid-tied and off-grid inverters.

High specific heat liquid cooling technology.

Modular “All-In-One” integrated single cabinet design.

Support multi-level parallel connection, bottom busbar design, maximizing land space utilization.

Multi-level fire protection and interlocking.

Easy and convenient transportation .

The 100kW/230kWh liquid cooling energy storage system adopts an “All-In-One” design concept, with ultra-high integration that combines energy storage batteries, BMS (Battery Management System), PCS (Power Conversion System), fire protection, air conditioning, energy management, and more into a single unit, making it adaptable to various scenarios.

It is suitable for industrial and commercial situations with high requirements for grid continuity and can cover communication energy storage, grid frequency modulation energy storage, wind and solar micro-grid energy storage, large-scale industrial and commercial distributed energy storage, data center energy storage, and photovoltaic power generation business in the new energy field.

EVB offers a range of charging stations covering various power capacities, seamlessly compatible with energy storage products, and suitable for diverse environments such as commercial areas, residential communities, or remote locations.

If you want to install residential electric vehicle chargepoints, our specialist team can help you every step of the way.
