Energy transition cape verde

Avenida do Brasil, 155 A, 1700-067, Lisboa, Portugal

Cabo Verde has set ambitious targets for renewables alongside improving security and quality of service. There is a consensus that adopting Smart Grid solutions is the key towards energy transition in the country. For this reason, a Smart Grid Roadmap has been developed by AF Mercados, to coordinate the stakeholders' visions and activities for Smart Grid deployment strategy, including the following services:

The Project has finished with the development of a complete set of project fiches for high priority Smart Grid deployments including detailed cost-benefit analysis, implementation plans and the result evaluation KPIs.

The set of Smart Grid activities has been developed and prioritized according to the following criteria:

Also, a series of discussions and capacity building activities has been developed with all stakeholders, to assure the optimum information diffusion and the best future Project development

Please feel free to contact us for any request or information.

If CitEc recognized a bibliographic reference but did not link an item in RePEc to it, you can help with this form .

If you know of missing items citing this one, you can help us creating those links by adding the relevant references in the same way as above, for each referring item. If you are a registered author of this item, you may also want to check the "citations" tab in your RePEc Author Service profile, as there may be some citations waiting for confirmation.

For technical questions regarding this item, or to correct its authors, title, abstract, bibliographic or download information, contact: Catherine Liu (email available below). General contact details of provider: #description .

Please note that corrections may take a couple of weeks to filter through the various RePEc services.
