

Environmental sustainability belgium

Sustainable development is a development approach which aims to meet the needs of present generations without jeopardising the ability of future generations to meet their own needs. Sustainable development represents a lever for innovation, and an opportunity to reassess our economic model, to ensure that our societies, the planet and our economy have a sustainable future.

The Agenda 2030 for sustainable development was adopted by 195 countries at the United Nations General Assembly in 2015. It includes 17 goals that incorporate the three dimensions of sustainable development: economic, social and environmental. The monitoring and implementation of the 17 sustainable development goals in Belgium falls under the responsibility of various public authorities.

In Belgium, sustainable development is a matter for the federal state, regions, communities and municipalities. To implement a sustainable development policy, we rely on:

What are the Sustainable Development Goals (SDGs)?

Discover the annual Key figures brochure, published by Statistics Belgium, the Statistics directorate of the Belgian FPS Economy. This brochure contains basic figures on population, society, territory, environment, economy, real estate, construction, mobility and transport.

Having a smartphone in your pocket is now the most common thing there is, among both young and old. The number of applications as well as the uses we are making of them on a daily basis are multiplying. This is where criminals and fraudsters come in: they are increasingly developing viruses specifically designed to target mobile devices and go on the attack.

But prevention is possible, and simple: only download applications from official app stores.

The federal government has decided to extend the support measures (VAT reduction and social rate for one million households) to cope with the explosive increase in energy prices. The banks are committed to protecting the most affected families. Measures will be taken to skim off the industry's excess profits to finance a solidarity fund. The government also calls on Belgians and companies to reduce their consumption and set a good example.

Belgium's energy supply is in good shape

A meeting of the Heads of State and Government of the member countries of the North Atlantic Treaty Organisation (NATO) will be held on Thursday, 24 March 2022 at NATO headquarters in Brussels. The summit, chaired by Secretary General Jens Stoltenberg, was convened in connection with the current crisis in

Ukraine.

In line with the EU Regulation, Belgium launched a national public consultation on 4 June 2019, which was open to citizens until 15 July 2019. 60,910 people completed the questionnaires. The results of the survey are available on the website (French).

The survey allows for the views of citizens and stakeholders to be included in the final National Energy and Climate Plan.
