The Global Gateway Africa - Europe Investment Package aims to support Africa for a strong, inclusive, green and digital recovery and transformation by:

The Global Gateway Africa-Europe Investment Package is being implemented through Team Europe initiatives: the EU, its Member States and European financial institutions work together to support concrete and transformational projects jointly identified in priority areas.

To tackle the global challenge of climate change, the EU works with Africa to maximise the benefits of a job-rich green transition and minimise threats to the environment in full compliance with the Paris Agreement.

Across the African continent, massive deployment of renewable energy and clean hydrogen production would contribute to have at least 40 Gigawatts of electrolyser capacity by 2030. It would also help develop the renewable hydrogen sector by unlocking business opportunities in both the supply and demand side for energy intensive industries.

The Investment Package will allow to increase renewable energy and hydrogen and share in the energy mix, access to affordable, reliable and sustainable energy as well as support market integration and sector reforms.

Ambition by 2030: Increase the renewable energy generation capacity by at least an additional 300 GW.

Initiatives undertaken under the Investment Package contribute to increasing sustainable use of natural resources and biodiversity protection and nature-based solutions as the basis of a green recovery, including support to the protection of landscapes and ecosystems.

Ambition by 2030: Improve the livelihood of 65 million people, capturing carbon, stabilising 3 million km² of land and ensuring water security.

The Investment Package supports more sustainable African agri-food systems by creating a conducive and transparent policy environment for sustainable private investments, enhancing investments in support to agri-food and fish-processing, facilitating innovation and boosting improved nutrition.

Ambition by 2030: accelerate the sustainable transformation of African food systems, in support of Africa's agriculture, fisheries and food development agenda.

Africa is particularly vulnerable to extreme impacts of climate change, which threatens to undo decades of economic progress and development. The Investment Package is contributing to building resilience by supporting in disaster risk reduction and climate change adaptation, enhancing disaster preparedness for

effective response and in recovery, rehabilitation and reconstruction and strengthening governance to manage disaster risk.

Ambition by 2030: Enhance capacity of partner countries to adapt to climate change and substantially reduce disaster risk.
