EV ownership is a big change for drivers accustomed to internal combustion engines. From regenerative braking to single-speed transmissions to charging, owning an electric vehicle comes with a new set of features and responsibilities. The most important of these is EV charging.

Much like plugging in your phone before going to bed, most of your charging is likely to happen at home. Home EV charging is much cheaper and more sustainable than DC fast-charging, and is the logical choice for anyone with access to the right power source.

The ChargePoint Home Flex EV Charger is our Best Overall Home EV Charger. The excellent ChargePoint app features a user-friendly interface and pinpoints your cost to the penny.

Our Best Budget Home EV Charger is the Emporia. Despite its affordable price, it doesn't sacrifice features.

Another great option is Tesla's Universal Wall Connector. It has a built-in adapter so you can switch between J1772 and NACS/J3400 plug types easily.

After thorough testing, the Gear Team picked seven of the best EV home chargers ranging in price from \$300 to \$700. These universal level 1 and 2 chargers will work with any EV on the market today. Some boast features like Wi-Fi connectivity, allowing users to monitor charging and control the unit via an app, while others are rugged, no-frills chargers made to last inside and out. Some chargers listed offer variants with slightly different prices.
