

Generac pwrcell pricing

Generac pwrcell pricing

The Generac PWRcell costs \$12,000 to \$20,000 on average installed, depending on the capacity. The PWRcell--pronounced "power cell"--is a home battery that stores energy generated by a solar panel system to provide 9 to 18 kWh of backup power in an outage.

Generac PWRcell prices start at \$10,000 for the 9 kWh base model, not including installation or solar panels. Larger PWRcell systems cost \$12,000 to \$17,000+ for the unit alone, depending on the capacity.

The PWRcell outdoor-rated cabinet costs \$3,000 to \$4,000. Each cabinet can hold three to six battery modules for a total capacity of 9 kWh to 18 kWh.

Additional 3 kWh battery modules cost \$1,900 to \$2,500 each. Generac's stackable system can be easily expanded by adding more battery modules later.

Labor to install a Generac PWRcell solar system costs \$2,000 to \$3,000 on average. Labor costs increase for systems requiring multiple battery cabinets or additional components.

Additional components to complete the solar system include:

Solar panels cost \$10,600 to \$26,500 on average installed after the tax credit.

A solar roof costs \$42,000 to \$80,000 installed and typically comes with a battery.

Installing a power cell may require upgrading the home's electrical panel. Replacing an electrical panel costs \$1,300 to \$4,000.

A Generac automatic transfer switch costs \$500 to \$900 for a 100-amp switch or \$900 to \$1,400 for a 200-amp switch.

Lithium-ion battery - The PWRcell is a lithium-ion battery, featuring the same nickel manganese cobalt (NMC) battery chemistry used in the Tesla Powerwall and LG Chem RESU.

EX vs. DCB models - The PWRcell is available in two models, the EX with a maximum operating temperature of 14°F to 122°F and the DCB with a maximum operating temperature of 41°F - 113°F.
