We're bringing you a plan that lets you protect the planet in big ways -- all while staying local. The Go Local Solar plan lets you tap into 100% local solar electricity from solar parks right here in Texas and is Green-e(R) Energy certified. Whether you own your home or rent, you can use the sun for good with no roof required and zero up-front costs.

As a bonus, we'll set aside money each month on your behalf for the Green Mountain Energy Solar Fund, created to help pay for a variety of projects, programs and solar-related technologies. Because growing solar power in Texas means a brighter planet.

When you sign up for the Go Local Solar plan, we purchase Renewable Energy Certificates (RECs) from solar parks in Texas. At times when the sun isn't shining, like during cloudy days and at night, we continue to power your home using electricity from the grid. We then purchase additional RECs to match your energy usage on this plan.

If the solar parks produce less energy than expected, we'll purchase additional Texas Solar Renewable Energy Certificates (SRECs) to match your usage. This guarantees that there will be enough solar energy produced locally to match the electricity usage of your home.

A solar park (also known as a solar farm) is a location that hosts a network of solar panels to convert sunlight into electricity that is then fed into the electricity grid. Green Mountain Energy purchases RECs from solar parks operated by third parties to meet the energy needs of our customers enrolled in this plan.

Green Mountain Energy Dakota Solar Park (near Dallas)

Green Mountain Energy Gable Solar Park (near Houston)

Green Mountain Energy Azure Solar Park (near McAllen)

These solar parks are registered with ERCOT and the PUCT as Bovine Solar, LLC, Yellow Jacket Solar, LLC and Azure Solar, LLC. For our use, Bovine Solar, LLC is branded as Green Mountain Energy Gable Solar Park, Yellow Jacket Solar, LLC is branded as Green Mountain Energy Dakota Solar Park, and Alexis Solar LLC is branded as Green Mountain Energy Azure Solar Park.

Green mountain energy solar plans

The Green Mountain Energy Go Local Solar plan is Green-e Energy certified and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at [green-e](https://www.green-e.org/) .
