At Green Power Technologies (GPT), we're not just changing the game; we're redefining it. Our mission is to empower businesses with sustainable, innovative remote power solutions that pave the way for a greener future. With our advanced Power Box and Juice Box systems, we offer a smarter alternative to traditional diesel generators, slashing operational costs and carbon emissions by 80%.

At GPT, we're tackling the challenges of remote power head-on. Our innovative products, such as the Power Box and Juice Box, offer reliable and environmentally responsible alternatives to traditional power sources. With a focus on sustainability and cutting-edge technology, we're empowering communities around the world to access clean, renewable energy.

Developed for Sustainability and Efficiency

Unleash the Power with Up to 198 m2 of Solar Panels

GPT is expanding its footprint, bringing renewable solutions to the global market. With a strong presence in the UK, South Africa, the Middle East, and Australasia, we're committed to broadening our distribution and forging new partnerships. Together, we can build a network of sustainable power that benefits communities worldwide.

Join us on our mission. Whether you are a part of the telecommunications, construction, agricultural, events, or any other sector, Green Power Technologies UK Ltd is ready to be your partner in sustainable growth. Together, we can illuminate the path to a sustainable future, energising our world one kilowatt at a time.
