Products & Services - Green Wing Solar

Personalized service - Green Wing Solar

For Residential - Green Wing Solar

There are no Institutional or Angel investors in Green Wing Solar Technology.

The climate of Vietnam is a fascinating thing. Because of the differences in latitude and the marked variety in topographical relief, the country's climate tends to vary greatly for each region. However, even though that is the case, there is still one thing that all the regions share to some extent -- and that is all of them do receive massive amounts of sun, with some regions getting more than the others.

The sunny quality of Vietnam's climate is actually a good sign right now because it means that this country can be a place where the solar industry can thrive. And the solar industry will thrive because there is already a growing demand for renewable energy nowadays and solar is arguably the most popular choice for renewable energy.

In fact, a testament to the rise of the solar industry in Vietnam is the fact that there are currently a number of solar manufacturers in the country. Here are some of the most well-known ones that you can check out.

&gt;&gt; Allesun New Energy | Reviews, product prices, contact, CEO

Incorporated in May 2006, Allesun New Energy is a company that specializes in making solar cells and solar modules, with current capacities being 300mw for solar cells and 500mw for solar modules. The company has its headquarters in San Jose, U.S.A., but it also owns two marketing or sales companies in Canada and the U.S.A. and two manufacturers in Vietnam and India.

Allesun's PV modules are manufactured with the supervision of the ISO90001 standard. As a result, they have obtained TUV/Intertek (IEC CE) and CSA (UL) certificates.

&gt;&gt; Boviet Solar Technology | Reviews, product prices, contact, CEO

Boviet Solar Technology Co., Ltd. is a Tier 1 integrated solar cell and module manufacturer with 1 GW annual production capacity. Aside from that, Boviet is also an investor for solar projects worldwide.
