

Hindlepower battery cabinet

Hindlepower battery cabinet

HindlePower's Battery Cabinet is designed to maximize DC system performance ...

HindlePower's Battery Cabinet is designed to maximize DC system performance and battery life, saving YOU time and money. The EPIC series battery cabinet offers a NEMA 3R and NEMA 1 modular design, with built in intelligence, will safely house any combination of batteries, chargers, DC distribution, and/or other ancillary equipment. Equipped with the HindleHealth System, the Battery Cabinet will keep your battery at the ideal temperature in the most extreme of environments, giving you peace mind.

A short video showing how to properly lift the Battery Cabinet

Designed to make your job easier, HindleHealth is an intuitive diagnostic and control platform that assists and verifies system operation without opening the door!

HindlePower's Outdoor Battery Cabinet is constructed of extremely durable injected foam panels that achieve a level of thermal performance not previously seen in traditional battery cabinets. Feel confident your batteries will maintain 65°F for outdoor ambient temperatures down to -40°F and 77°F for outdoor ambient temperatures to 122°F. Take a look at our 3rd party test data [here](#) to view it yourself.

HindlePower's Outdoor Battery Cabinet is certified to IBC 2012, CBC 2013, and IEEE 693 to the highest levels. See our certification document [here](#) for more information.

Outdoor NEMA 3R modular design easily expands and can accommodate any configuration of batteries and DC power equipment. This becomes a great alternative for substations with limited interior space allowing for consolidation of your DC power system.

HindlePower's Outdoor Battery Cabinet takes a proactive approach to hydrogen mitigation. Rather than using a monitor to alarm when the amount of hydrogen exceeds the lower explosive limit, the Cabinet purges the air based on battery Ah capacity and technology based on the guidelines set forth in IEEE 1635.

Industry leading warranty with best in class customer service

Meets or exceeds industry standard IEEE 2405, TPL-001 and specifications UL 1564, UL 1012, to name a few. Backed by an industry leading 5-Year Warranty.

HindlePower's pursuit of DC System Reliability has led to the development of the HindleHealth+. An electronically enhanced shunt, capable of continuously detecting open battery and calculating the anticipated amp-hour remaining in your battery offering the industry's highest level of resolution and accuracy.

Hindlepower battery cabinet

We offer an extensive family of versatile dc cabinets and custom battery houses. Designed for both indoor (NEMA1) and outdoor (NEMA 3R) applications, these systems accommodate battery chargers, dc panels, batteries and other ancillary products such as ac-dc inverters, dc-dc converters and battery monitoring.
