Home solar battery prices australia

Solar batteries are improving dramatically in their chemistry, effectiveness and ...

With feed-in tariffs steadily dropping, now may be as good a time as any to invest in a solar battery storage system. Though, as you may already know, it's not exactly easy to drop thousands of dollars on a system that takes some time to see a return on investment.

But don't worry, if instant gratification is what you're after, there are some cheaper options on the market that'll speed up that payback process of your solar battery - depending on your situation, of course.

Keep reading to discover some of the cheap batteries for solar currently available in Australia. Please note, this information should be treated as a general guide only. Before making any purchase decisions it is best to get in contact with a licensed solar installer that can recommend storage system units based on your personal energy circumstances.

Over the last 15 years, SolarQuotes(R) has steadily built a network of heavily vetted solar installers. Get up to 3 free, no-obligation quotes for solar, batteries, and EV chargers.

Below we've compiled some of the solar batteries currently available on the Australian market for less than \$2,500. Please note, this is an estimated price and does not include installation costs. Some brands listed may also offer models with larger sizing and capacity, however, these may come at an additional cost.

What's good about this battery:

Below you'll find some of the solar batteries available in Australia for less than \$4,500. Please note, this is an estimated price and does not include installation costs. These brands may also offer models with larger sizing and capacity.

*NSW, QLD and SA: Price is GST inclusive and is: The estimated lowest possible price a representative customer would be charged in a year for this plan, assuming all conditions of discounts offered (if any) have been met, based on the AERu2019s model annual usage in the distribution region as stated at the top of each table.

~VIC: Price is GST inclusive and is: The estimated lowest possible price a customer would be charged in a year for this plan, using the Victorian Governmentu2019s annual reference consumption for domestic customers in your distribution region as stated at the top of each table and assuming all conditions of discounts offered (if any) have been met.

Home solar battery prices australia

Price is GST inclusive and is: The estimated lowest possible price a representative customer would be charged in a year for this plan, using the Independent Competition and Regulatory Commission (ICRC) annual reference consumption for domestic customers in your distribution region as stated at the top of each table and assuming all conditions of discounts offered (if any) have been met.

Some plans may require you to meet certain conditions before a discount may become available to you. Check the energy provider's plan information for details of all possible discounts that may apply and any conditions that need to be met to be eligible for these discounts. Some plans may have a minimum term longer than one year. In that case the total cost over the term will be much higher than the price (which is only for one year). Consider the provider's detailed product and pricing information before making a decision to take out a new plan or switch electricity providers.
